NAME INDEX

to Papers and Reviews

Abegg, R.	Change of Salts by Cathode Rays	792
"	Dielectric Constant at Low Temperatures. R.	459
"	Freezing-point Apparatus. R.	65
Agafonow	Absorption of Ultraviolet Rays by Crystals. R.	330
"	Absorption of Light by Crystals	792
Ahrens, F. B.	Electrolysis of Nitriles. R.	204
Aignan, A.	Solubility of Liquids. R.	743
Altschul, E.	Solubility Determinations. R.	378
Alvisi, U.	Molecular Weights in Liquids and Solids. R.	502
Amagat, E. H.	Corresponding States. R.	66
"	The Law of Corresponding States. R.	510
Ambronn, H.	Pleochroism in Vegetable and Animal Fibres. R.	530
Ambronn & LeBlanc,	Isomorphous Mix Crystals. R.	445
Ames & Humphreys,	The Spectra of Helium, R.	457
Ampola & Carlinfanti,	Nitrobenzene in Cryoscopy. R.	251
Ampola & Rimatori,	Cryoscopic Solvents. R.	440
"	Methyl Oxalate in Cryoscopy. R.	509
Andreas, E.	Electricity from Chemical Sources. R.	320
Anelli, L.	Absorption of Hydrogen by Platinum. R.	512
Appleyard, L.	Dielectrics, R.	319
Arctowski, H.	Solubility of Solids in Gases. R.	260
"	Sublimation Pressures of Iodin. R.	266
"	Velocities of Sublimation. R.	266
D'Arcy, R. F.	Dissolved Hydrates. R.	62
Armstrong	The Electrolytic Dissociation Theory. R.	449
Arnold, W.	On Luminescence. R.	752
Arons, L.	Polarization Phenomena with Thin Membranes. R.	320
Aubel, E. van	Transparency of Substances for X-rays. R.	334
Auwers & Orton,	Cryoscopic Investigations. R.	316
Bach, A.	Peroxids in Slow Oxidation. R.	748
Bagard, H.	Hall's Phenomon in Liquids. R.	268
"	Hall's Phenomenon in Liquids. R.	532
Bakker, G.	A Property of the Heat of Vaporization. R.	504
"	Laws of Boyle, etc. R.	198
"	Molecular Forces. R.	377
"	On the Molecular Pressure, II. R.	594
"	The Laws of Boyle, Gay-Lussac, etc. R.	688
"	Theory of Corresponding States. R.	314
"	Theory of Corresponding States. R.	315
Balmer, J. J.	Wave Lengths of Spectra Lines. R.	627
Bancroft, W. D.	A Triangular Diagram,	403
"	Correction	786
"	Note,	556
"	On Ternary Mixtures, II	34
"	On Quintuple Points,	337
"	Solids and Vapors, Second Paper,	344
"	Solution and Fusion,	137
"	Ternary Mixtures, III	760
"	Two Liquid Phases, First Paper,	414
"	Two Liquid Phases, Second Paper,	647
Barendrecht, H. P.	Hydrates of Alcohol. R.	192
Barlow, W.	Circular Polarization and Symmetry of Structure. R.	534
Barus, C.	Long Range Temperature and Pressure Variables. R.	738
Baskerville, C.	Concentrated Sulfuric Acid and Copper. R.	317
Bathrick, H. A.	Precipitation of Salts,	157

Battelli, A.	On the Thermal Properties of Vapors. R.	584
Baubigny, H.	Heating the Peroxid of Antimony. R.	600
Baynes, R. E.	The Laws of Boyle, Gay-Lussac, Joule, etc. R.	442
Beattie, J. C.	Hall Effect and Thermoelectricity. R	268
Becker, G. F.	Note on Computing Diffusion. R.	610
Beckmann, E.	Determination of Molecular Weights. R.	589
"	Molecular Weights, IV. R.	257
Becquerel, H.	Uranium Rays. R.	336
Bedson, P. P.	Lothar Meyer Lecture. R.	246
Bemmelen, J. M. van	The Water in the Colloids. R.	444
Benedict, C. H.	Distillation with Vapor,	397
Benoist, L.	Action of X-rays on Gaseous Dielectrics, R.	456
"	Law of the Transparency of Gases for the X-rays. R.	532
Berthelot, M.	Electrical Absorption of Nitrogen. R.	600
"	Reactions in Gases. R.	749
"	Specific Heats and Constitutions of Elementary Gases. R.	503
Berthelot & André,	History of Metaphosphoric Acid. R.	517
"	Phosphoric Acid and Ether. R.	194
"	Volatility of Levulinic Acid. R.	121
Berthelot & Vieille,	Explosive Properties of Acetylene. R.	260
"	Explosive Properties of Acetylene. R.	749
Bertrand, G.	Influence of Manganese upon oxidations. R.	748
Besson, A.	Chlorobromids of Tin. R.	744
"	The Iodids of Phosphorus. R.	740
Biernacki, V.	Aluminum Amalgam. R.	317
Biltz, H.	Measuring Flask. R.	185
Blumcke, A.	Unstable Equilibrium. R.	196
Bodenstein, M.	Decomposition and Formation of Hydriodic Acid. R.	601
"	Decomposition of Hydriodic Acid by Light. R.	612
Bodländer, G.	Abnormal Depressions of the Freezing-point. R.	317
Bödtker, E.	Influence of Water on Solubility in Alcohol, etc. R.	599
Bogojawlensky & Tammann,	Influence of Pressure on Reaction Velocity. R.	696
Boisbaudran, L. de	Classification of the Elements. R.	502
Boltwood, B. B.	Automatic Sprengel Pump. R.	377
"	Molecular Conductivities of Chlorids. R.	525
Boltzmann, L.	Again on Atomistics. R.	677
"	On Energetics. R.	308
"	Reply to Zermelo's Article. R.	433
"	The Indispensibility of the Atomistik. R.	434
Bone & Cain,	The Explosion of Acetylene with Oxygen. R.	517
Bone & Jerdan,	Direct Union of Carbon and Hydrogen. R.	512
Bonnefoi, J.	Combinations with Lithium Haloids. R.	591
Boot, J. G.	Pyknometer. R.	376
Borchers, W.	Electrical Furnaces. R.	391
"	Separation of Gold and Silver. R.	204
"	The Crystallization of Carbon. R.	508
Bosi, I.	Electrical Resistance of Solutions in Motion. R.	621
Bourquelot, E.	The Oxidizing Ferment of Mushrooms. R.	124
Braun, F.	Conductivity of Electrified Air. R.	329
"	Directed Surface Conductivity. R.	329
"	The Change of an Electrical Property in a Film. R	321
Brauner, B.	The Basis of the Atomic Weight. R.	581
Brion, G.	Conductivity of Carbon. R.	388
Brown, O. W.	Solubility and Boiling Point,	784

Brown & Pickering,	Thermal Phenomena Accompanying Change in Rotation. R.	738
"	Thermochemistry of Carbohydrate Hydrolysis. R.	738
Brühl, J.	Spectrometric Experiments with Stereoisomers. R.	456
Brühl, J. W.	Spectrometer Determinations. R.	533
"	Hydrazin, Hydrogen Peroxid, and Water. R.	534
"	Spectrochemistry of Nitrogen. R.	625
Brunhes, B.	Absorption of Sound and Conductivity for Heat. R.	751
Bruni, G.	On Cryohydrates. R.	686
Bucherer, A. H.	Discussion. R.	522
"	Electromotive Force and Distribution Equilibrium, R.	616
"	Priority Explanation. R.	130
"	Magnetism and Electromotive Force. R.	127
"	Magnetism and Electromotive Force. R.	448
"	Reply to Nernst. R.	697
Buckingham, E.	Theorem of Clausius. R.	112
Bugarszky, S.	E.M.F. of Formation of Mercury Compounds. R.	616
Burbury, S. H.	Application of the Kinetic Theory to Dense Gases. R.	595
Burch, G. J.	Hermann's Theory of the Capillary Electrometer. R.	520
Cady, H. P.	The Electrolysis and Electrolytic Conductivity of Certain Substances dissolved in Liquid Ammonia,	707
Cailletet, L.	The Eiffel Tower Manometer. R.	738
Campanile, F.	A Specific Gravity Bottle. R.	582
Campbell, E. D.	Diffusion of Sulfids through Steel. R.	516
Cardani, P.	Electrical Discharges in Electrolytes. R.	620
Carrara, G.	Electrolytic Condition of Solutions in Methyl Alcohol. R.	452
"	Electrolytic Condition, etc. R.	528
"	Electrolytic Dissociation in Acetone. R.	622
"	Electrolytic Dissociation in Methyl Alcohol. R.	749
Case, W. E.	Electricity from Carbon. R.	523

NAME INDEX

to New Books

Ahrens, F. B.	Elektrochemie,	109
Allen, A. H.	Commercial Organic Analysis,	428
Altschul, M.	Zeitschrift für comprimirte and flüssige Gase,	574
Annuaire du Bureau des	Longitndes,	244
Ariès, E.	Chaleur et Energie,	565
Bailey, G. H.	The Tutorial Chemistry,	568
Bancroft, W. D.	The Phase Rule,	559
Behrens, H.	Das mikroskopische Gefüge de Metalle und Legierungen,	571
Biedermann, W.	Electrophysiology,	304
LeBlanc, M.	The Elements of Electrochemistry,	176
Bodländer, G.	Lehrbuch der Chemie, I.	101
Boltzmann, L.	Vorlesungen ueber Gastheorie,	234
Borchers, W.	Elektrometallurgie,	241
"	Entwickelung, Bau und Betrieb der elektrischen Oefen,	570
Bucherer, A. H.	Eine Kritik der Nernstschen thermodynamischen Auschauungen,	669
"	Grundzüge einer thermodynamischen Theorie elektrochemischer Krüfte,	576
Classen, A.	Quantitative Analyse durch Elektrolyse,	569
Comey, A. M.	A Dictionary of Chemical Solubilities,	53
Dannemann, F.	Grundriss einer Geschichte der Naturwissenschaften,	173
Deventer, Ch. M. van	Physical Chemistry for Beginners,	671
Duhem, P.	Théorie thermodynamique de la Viscosité,	369
"	Traité de Mécanique chimique,	426
Dumont, G.	Electromoteurs et leurs Applications,	570
Étard, A.	Les nouvelles théories chimiques,	110
Fabry, Ch.	Les Piles Electriques,	674
Faraday, M.	Experimental-untersuchungen,	373
"	Experimental-Untersuchungen ueber Elektrizität	672
Fodor, E. de	Elektricität direkt aus Kohle,	501
Gattermann, L.	Practical Methods of Organic Chemistry,	99
Gautier & Charpy,	Leçons de Chimie,	238
Hallervorden, Dr.	Das Interferenzprinzip,	566
Helm, G.	The Principles of Mathematical Chemistry,	561
Helmholtz, H. von	Theorie der Luftschwingungen,	373
"	Vorlesungen üeber theoretische Physik,	557
"	Zwei hydrodynamische Abhandlungen,	172
Hertz, H.	Miscellaneous Papers,	106
Hoff, J. H. van 't	Studies in Chemical Dynamics,	305
van 't Hoff-Cohen,	Studien zur chemischen Dynamik,	107
van 't Hoff & Paul,	Vorlesungen über Doppelsalzen,	368
Joannis, A.	Traité de Chimie organique appliquée,	575
Keller, H.	Ueber den Urstoff und seine Energie,	566
Ladd, G. T.	Philosophy of Knowledge,	787
Lassar-Cohn, Dr.	Die Chemie im täglichen Leben,	565
Liebisch, Th.	Grundriss der physikalischen Krystallographie,	100
Loader, J. H.	The Universal Law of the Affinity of Atoms,	175
Löb, W.	Encyclopädie der Elektrochemie,	572
Lüpke, R.	Elektrochemie,	97

Maack, F.	Die Weisheit von der Welt-Kraft,	172
Mach, E.	Die Prinzipien der Waermelehre,	429
"	Popular Scientific Lectures,	170
"	The Analysis of the Sensations,	499
Marqfoy, G.	Loi des Équivalents et Théorie nouvelle de la Chimie,	571
Mason, W. P.	Qualitative Analysis,	241
Medicus, L.	Kurzes Lehrbuch der chemishen Technologie,	574
Merriman & Woodward,	Higher Mathematics,	306
Meyer, L.	Die Atome,	96
Minet, Ad.	Électro-Metallurgie,	674
Mitscherlich, A.	Gesammelte Schriften von Eilhard Mitscherlich	175
Moissan, H.	Der Elektrische Ofen,	673
"	Le Four Électrique,	673
Moissan & Ouvrard,	Le Nickel,	735
Morgan, J. L. R.	An Outline of the Theory of Solution and its Results,	563
Mouret, G.	L' Entropie, sa Mesure et ses Variations,	734
Murray, D. A.	Introductory Course in Differential Equations	564
Nernst & Borchers,	Jahrbuch der Elektrochemie,	177
"	Jahrbuch der Elektrochemie, 1896,	672
Neumann, B.	Theorie und Praxis der analytischen Elektrolyse der Metalle,	568
Neumann, F. E.	Theorie der doppelten Strahlenbrechung,	172
Nichols, E. L.	The Outlines of Physics,	567
Nichols & Franklin,	The Elements of Physics, I.	104
"	The Elements of Physics, II.	181
"	The Elements of Physics, III.	566
Oettel, F.	Elektrochemische Uebungsaufgaben,	429
Ostwald, W.	Elektrochemie,	51
"	Lehrbuch der allgemeinen Chemie,	366
"	Lehrbuch der allgemeinen Chemie,	788
Pauli, R.	Der erste und zweite Hauptsatz der mechanischen Warmetheorie,	500
Peddie, W.	A Manual of Physics,	240
Peters, F.	Angewandte Elektrochemie,	501
Pictet, R.	L' Acétylene,	571
"	Étude critique du Matérialisme et du Spiritualisme per la Physique expérimentale,	674
"	Le Carbite,	571
Planck, M.	Vorlesungen ueber Thermodynamik,	572
Ponsot, A.	Recherches sur la Congélation	178
Ramsay, W.	The Gases of the Atmosphere,	243
Riecke, E.	Experimental-Physik,	103
Scheurer-Kestner, M.	Pouvoir calorifique des Combustibles, solides, liquides et gazeux,	570
Sperber, J.	Parallelogram der Kräfte,	108
Steiner, J.	Geometrische Gestalten,	373
Thorpe, T. E.	Humphry Davy, Poet and Philosopher,	180
Trevor, J. E.	The Molecular Theory,	58
Venable, F. P.	The Development of the Periodic Law,	239
Le Verrier, M. U.	Les applications de l' èlectrolyse a la métallurgie	242
Voigt, W.	Kompendium der theoretischen Physik,	55
Waals, J. D. van der	La Continuité des États gazeux et liquide,	670
Wiedemann & Ebert,	Physikalisches Praktikum.	734
Wilby, K. F.	Der Dualismus in der Materie,	173
Winkelmann, A.	Handbuch der Physik,	182

SUBJECT INDEX

Excluding New Books

Abegg Method for Freezing-point Determinations. E. H. Loomis, - 221
Abnormal Solubility, R. - - - - - - 259
Absorption, in Colloids, R. - - - - - - - 444
— of Dilute Acids by Silk, R. - - - - - 249
— Electric, Methods for Measuring, R. - - - 750
— Electrical, of Nitrogen by Carbon Compounds, R. - 600
— of Hydrogen Sulfid by Liquid Sulfur, R. - - - 381
— of Hydrogen by Platinum, R. - - - 512
— of Light, R. - - - - - - 118
— of Light by Crystals, R. - - - - 792
— of Nitric Oxid by Ferrous Bromid, R. - - - 382
— of Röntgen Radiation by Gases and Vapours, R. - - 628
— of Sound and Conductivity for Heat, R. - - 751
— of Ultra-violet Rays by Crystals, R. - - - 330
— of Ultra-violet Rays by Vapors and Liquids, R. - - 752
— in Ultra-violet Spectrum by Crystalline Substances, R. - 334
Absorption Spectra, of Fluorescent Substances, R. - - 455
— and Structure of Colorless Organic Compounds, R. - - 626
Accumulator, A New Form, R. - - - - 520
Accumulators, Cyanids in, R. - - - - - - 522
— Internal Resistance of, R. - - - - - 616
Accumulators of Lead, Theory of, R. - - - - 204
Acetone, Electrolytic Dissociation, R. - - - 622
Acetones, Use in Development of Latent Photographic Image, R. - 531
Acetylene, Conductivity in Water, R. - - - - 202
— Explosions with Oxygen, R. - - - - - 517
— Explosive Properties of, R. - - - 260, 749
Acid Amides, Hydrolysis of, R. - - - - 516
Acids, Dilute, Absorption by Silk, R. - - - - 249
— of Halogens at Low Temperatures, R. - - - 311
— from Lactones, Rotation during Transformation, R. - - 331
Adiabatic Relations of Ethyl Oxid, R. - - - - 378
Adsorption of Vapors, R. - - - - - - 185
Adulteration of Milk, Detection by the Freezing-point, R. - - 515
Affinity (Chemical), in Solutions, R. - - - - - 116
Affinity Constants, and Chemical Constitution of Organic Acids, R. 323, 617
Affinity and Valence, in Calculations of the Heats of Dissociation and Formation, R. - - - - - - - 582
Air, Conductivity of Electrified, R. - - - - - 329
— Specific Heat of, R. - - - - - - 59
Air Thermometer, Constant Volume. J. R. Erskine Murray, - - 714
Alcohol, Conductivity of Diethylammonium Chlorid in, R. - 623
— Boiling-point Method and Solid Solutes in Determining, R. - 262
— Dielectric Constant at Low Temperatures, R. - - 706
— Hydrates of, R. - - - - - - 192
— Solutions of Hydrates, Influence of Water on, R. - - 599
— Superfusion and Freezing-point of Solution, R. - - 590
Alcohols and Water, Colors of, R. - - - - 194

Aldehydes, Use in Development of Latent Photographic Image, R. 531
Alkali Haloids, Solubility in Presence of Free Acid, R. - - 382
— Solubility in Presence of Free Base, R. - - 382
Alkali Salts, Isomorphism of, R. - - - - - - 332
Alkali Sulfates, Action of Hydrochloric Acid Gas on, R. - 378
Alkali Trihalids, R. - - - - - - - 253
Alkalies, Determination in Presence of Carbonates, R. - - 327
Alkaline Haloid Salts, Artificial Coloration of Crystals, R. - - 534
Alkaline Metals, Action of Silicon on, R. - - - 246
Alkyl Ammonium Hydrosulfids, Dissociation Pressure of, R. - 591
Allotropy of Sucrose. F. G. Wiechmann, - - - 69
Alloys, R. - - - - - - - - 250
— Binary, containing Silver or Copper, Freezing-point Curves, R. 312
— of Cadmium with Silver and Copper, R. - - - 528
— Constitution of, R. - - - - - - 740
— Freezing-point Curves of Binary, R. - - - - 686
— Fusibility of Metallic, R. - - - - 250
— Gold and Silver Dissolved by Potassium Cyanid from, R. - 603
— of Gold, R. - - - - - - - 62
— of Gold, Liquation of, R. - - - - - - 311
— of Iron and Antimony, Density and Mean Specific Heat, R. 262, 446
— New Method of Preparation, R. - - - - 513
— of the Silver-Copper Group, R. - - - - - 740
— of Zinc, Freezing-points of, R. - - - - 592
Alternating Currents, Displacement of Phase in a Voltameter by, R. - 519
— Lead Sulfate in Electrolysis with Lead Electrodes, R. 453
— Resistance of Electrolytes, R. - - - - - 388
— with Unpolarizable Electrodes, R. - - - - 269
Aluminum, Action on Mercury Salts, R. - - - - - 135
— Action of Silicon, R. - - - - - - 246
— for Condensers, R. - - - - - - 437
— Amalgam, Remarks on, R. - - - - - 317
Alums, Aqueous Solutions of, R. - - - - - - 452
Amalgam of Aluminum, Remarks on, R. - - - - 317
— and Electrolytes, Equilibrium between, R. - - 605
American Association for the Advancement of Science, Address before Section B. R. - - - - - - 202
Amido-azo from Diazo-amido Compounds, Velocity of Transformation, R. 122
Amido Sulfonic Acid, Molecular Conductivity of, R. - - - 452
Amide, Constitution Determined Cryoscopically, R. - - - 591
Amins, Conversion from Nitriles by Electrolysis, R. - - - 204
Ammonia, Electrolysis and Electrical Conductivity in Liquid. Hamilton P. Cady, - - - - - - - - 707
— and Halids of Lithium, R. - - - - - - 591
— and Potassium Cyanid with Oxids and Sulfids of Molybdenum, R. 194
— on Tellurium Bichlorid, R. - - - - - 382
Ammonia Compounds of Silver Chlorid, R. - - - - 509
Ammoniacal Salts, Expansion in Solutions of, R. - - - 604
Ammonium, Double Halids with Lead, R. - - - - - 509
— Double Halids with Magnesium, R. - - - 509
— Cyanid, Formation of, R. - - - - - 744
— Salts, Volume increase in Solutions of, R. - - 257
— Sodium Tartrate, Decomposition of, R. - - - 685
Analytical Chemistry, Significance of the Dissociation Theory, R. 391
Anilin, as Cryoscopic Solvent, R. - - - - - - 440
— Diazotising of, R. - - - - - - - 324
Animal Fibres, Pleochroism, when colored with Gold or Silver Salt, R. 530
Anodes, Soluble, Separation of Metals by, R. - - - 452
Antimony, Action of Silicon on, R. - - - - - 246
— and Iron, Density and Mean Specific Heat of Alloys of, R. 262, 446

Antimony, Peroxid at high Temperatures, R. - - - 600
— Trichlorid in Friedel-Crafts Reaction, R. - - - 63
Aqueous Solutions, Physical Properties and Ionization of, R. - 450
Apparatus for Determining Surface Tension of Liquids, R. - - 121
Argon, in the Atmosphere, R. - - - - 247
— Combination with Water, R. - - - - 121
— Density of, R. - - - - - 511
— Knowledge and Bibliography of, R. - - - 444
— Spectrum of, R. - - - - - 395, 457
— Transpiration through hot Palladium, Platinum or Iron, R. 696
— and Helium, Homogeneity of, R. - - - - 310
Aromatic Acids, Esterification of, R. - - - - 385
Aromatic Compounds, Magnetic Rotary Power of, R. - 191, 334
Arsenic, Atomic Weight of, R. - - - - 310
Asparagin, R. - - - - - - - - 63
Aspartic Acid, R. - - - - - - - - 63
— Solutions, Optical Rotation in, R. - - - 63, 626
Atmosphere, Argon in the, R. - - - - - 247
Atmospheric Air, Composition of, R. - - - - 511
Atomic Constitution of Elementary Gases, R. - - - 503
Atomic Masses of Silver, Mercury, Cadmium, by the Electrolytic Method, R. 376
Atomic Refraction of Carbon, Hydrogen, Oxygen, and the Halogens, R. 533
Atomic Theory, Genesis of, R. - - - 187, 736
Atomic Weight of Arsenic, R. - - - - - - 310
— of Cerium, R. - - - - - - 737
— of Magnesium, R. - - - - - - 246
— of Nitrogen, R. - - - - - - 310
— of Tellurium, R. - - - - - - - 63
Atomic Weights, Basis of, R. - - - - - 581
— of the Elements, Relations among, R. - - 194, 247, 502
— Report of Committee for 1896, R. - - - 581
— Unit of, R. - - - - - - 310, 581
Atomistics, R. - - - - - - - 677
— in Natural Science, R. - - - - - 434, 676
Autocatalysis, R. - - - - - - - 264
Autoxidation, R. - - - - - - - 526
Avogadro-Ampère Principle as a Limiting Law, R. - - 510
Azo Dyes, Dynamic Investigation of the, R. - - - 612

Bacteria, Behavior towards Reagents, R. - - - - 389
Balance in Chemistry, Introduction of, R. - - - 436
Barium, Strontium, Calcium, Analogies among Salts of, R. - - 502
— Sulfate, Solubility of, R. - - - - 66
Basis of the Atomic Weights, R. - - - - - 581
Battery, Jacques Carbon, R. - - - - - 322
— Thermotropic, R. - - - - - - 322
Beckmann Apparatus, Changes in, R. - - - - 582
Benzaldehyde in the Formation of "Active" Oxygen, R. - - 745
Benzene Derivatives, Enantiamorphism of, R. - - - 386
Benzene and Phenol, Solid Solution, R. - - - - 260
Benzoic Acid, Electrolysis of, R. - - - - - 204
Benzoyl-Peroxid, Formation by "Active" Oxygen, R. - - 514
Bibliography of Argon, R - - - - - 444
Binary Mixtures, Freezing-points of, R. - - - - 377
Biological Thermodynamics, R. - - - - - 582
Birotation of Glucose, R. - - - - - - 614
Bismuth, Action of Silicon on, R. - - - - - 246
— Effect of High Temperature on the Sulfid of, R. - - 740
— Relation between Hall Effect and Thermoelectricity in, R. 268
— Resistance in Liquid Air, R. - - - - 321

Bismuth, Resistivity at Low Temperatures and in Magnetic Fields, R. 617
— Solubility in Zinc, R. - - - - - 252
Bodländer, Comments of, R. - - - - - - 589
Boiling-point Apparatus, R. - - - - - - 743
— Determinations. H. J. Steuber, - - - - 643
— Method for Determination of Alcohol, R. - - 262
— and Solubility. O. W. Brown, - - - - 784
Boiling-points, Heat of Vaporization at the, R. - - - 440
— of Ternary Mixtures. W. Lash Miller, - - - 633
— Viscosity of liquids above their, R. - - - 197
Boiling Temperature, Molecular Weight Determinations, R. - 511
Bolometric Investigation of Absorption Spectra of Fluorescent Substances, R. - - - - - - 455
Boltzmann, Reply to, R. - - - - - - - 432
Bomb Calorimeter, Hydrothermal Value of, R. - - - 739
Borate of Lithium, R. - - - - - - - 739
Boric Acid in Glasses and Enamels, R. - - - 381
— and its Salts, R. - - - - - - 190
Bottles, Machine for Shaking, R. - - - - 245
Boyle, Gay-Lussac, Joule, etc. Laws of, R. - - 198, 442, 688
Boyle's Law, at very Low Pressures, R. - - - 443
British Association, Comparison of Normal Resistances, R. - - 320
Broadening of Sodium Lines by Magnetic Fields, R. - - 626
Bromids, Double, R. - - - - - - 247
Bromine, Displacement from Organic Bromids by Light, R. - 457

Cadmium, Alloys with Silver and Copper, R. - - - 528
— Atomic Mass by Electrolytic Method, R. - - 376
— Electrolytic Purification of, R. - - - - 327
— Emission Spectra of, R. - - - - 628
Cadmium Normal Cell, R. - - - - - 267
Caesium Chlorid, Molecular Conductivity of, R. - - 525
Calcium, Strontium, and Barium, Analogies among Salts of, R. - 502
Calcium Chlorid, Vapor Pressures of Hydrated, R. - - 440
Calorimeter, Hydrothermal Value of the Bomb, R. - - - 739
Calorimetric Study of a Salt, Complete, R. - - - 693
— of Saturated Liquids, R. - - - - - 248
Calorimetric Work, Water Equivalent of Thermometers for, R. - 503
Camphanic Acid, R. - - - - - - - 62
Camphol, Dimorphism of the Succinates of, R. - - 528
— Isomorphism of Succinates of Iso-camphol β, and, R. - 528
Camphotricarboxylic Acid, R. - - - - 62
Cane Sugar, Catalytic Action of Metals in Inversion, R. - - 386
— Inversion Under 500 Atmospheres Pressure, R. - - 265
Capacity, Polarization, R. - - - - - 323, 696
Capillarity, R. - - - - - - - 59, 700
— Constants, Criticism of Methods, R. - - - 751
— of Molten Metals, R. - - - - 532, 751
Capronic Acids, Solubility of Salts of, R. - - - 378
Carbohydrate Hydrolysis, Thermochemistry of, R. - - - 738
Carbohydrate Solutions, Thermal Phenomena and Rotatory Power in, R. 738
Carbohydrates, Molecular Volumes of, R. - - - 743
Carbon, Atomic Refraction of, R. - - - - - - 533
— Conductivity of, R. - - - - - - 706
— Cylinders, Porous, in Electrolysis, R. - - - 327
— Direct Union with Hydrogen, R. - - - - 512
— Electricity without Heat from, R. - - - - - 523
— Electrochemical Equivalent of, R. - - - - 619
— Favorable Conditions for Crystallization of, R. - - 508
— Glowing, Chlorin and Steam, Action of, R. - - 606

Carbon, Iron, and Ferric Chlorid, Cells of, R. - - - 522
— In Metals, Solubility of, R. - - - - 63
— Passage from Non-conducting to Conducting State, R. - 388
— Reactions in Electrolysis, R. - - - - 525
— Slow Oxidation of, R. - - - - - 446
— Solubility in Rhodium, Iridium and Palladium, R. - 63
— Transformation of Energy of, R. - - - - 131
— Modifications of, R. - - - - - 118
Carbon Cell, Action in the Jacques, R. - - - - 320
— Process in, R. - - - - - 616
Carbon Compounds, Electrical Absorption of Nitrogen, R. - - 600
— Molecular Weights in Solution of. C. L. Speyers, - - 766
Carbon Monoxid, Slow Oxidation of, R. - - - 265
Carbonic Oxid and Chlorin Peroxid, Explosion of, R. - - 696
Catalysis, with Antimony Trichlorid, R. - - - - 63
— with Metals in Inversion of Cane Sugar, R. - - 386
Catalytic Action of Acids in Etherification, R. - - - 199
Cataphoresis in Medicine, R. - - - - - 698
Cathode Rays, Color Changes of Salts under, R. - - 530, 792
Cathode and Röntgen Rays, R. - - - - 792
Cell, Cadmium Normal, R. - - - - - 267
— Action in the Jacques Carbon, R. - - - - 320
— Electromotive Force of the Clark, R. - - - 267
— Iron, Ferric Chlorid, Carbon, R. - - - - 522
— of Lead, R. - - - - - - 522
— Polarization and Resistance of, R. - - - 322
— Process in the Carbon, R. - - - - 616
Cells, Internal Resistance of, R. - - - - 616, 697
— Irreversible. A. E. Taylor, - - - - 1, 81
— Osmotic Properties of, R. - - - - 609
— Single Liquid, - - - - - - 1
— Two New Voltaic, R. - - - - - 481
Cerium, Atomic Weight of, R. - - - - - 737
Change of Salts by Cathode Rays, R. - - - 530, 792
Change of State, Pressure Influence, R. - - - 599
Characteristics in Curve of Folding of Mixture of Two Substances, R. 313
Chemical Action, at a Distance, R. - - - - 516
— of Electric Oscillations, R. - - - - - 630
— of Light, R. - - - - - - 699
Chemical Affinity in Solutions, R. - - - - 116
— Equilibrium of Metallic Mixtures, R. - - - 615
— Individual, - - - - - - 27
— Laboratory, An Ideal, R. - - - - 309
— Proportions, R. - - - - - - 579
— Reactions, in Gases, R. - - - - - 124
— Systematics, - - - - - - 27
— Theory of Solutions, R. - - - - - 603
Chemistry, and its Laws, F. Wald, - - - - 21
— The Teaching of, R. - - - - - 60
Chlorates, Electrolytic Hypothesis regarding the Manufacture of, R. 620
Chloric Acid, Color Reaction with Aromatic Bodies, R. - - 458
Chlorid, Mercuric. D. McIntosh, - - - - 298
Chlorid of Copper. J. K. Haywood, - - - - 411
Chlorids, Double, R. - - - - - - 247
Chlorin, Action of Light on Mixtures of Hydrogen and, R. - 748
— In Hydrochloric Acid, Transference number of, R. - - 622
— From Potassic Chlorate, R. - - - - 63
Chlorin Peroxid and Carbonic Oxid, Explosion of, R. - - 696
Chlorin and Steam, Action on Glowing Carbon, R. - - 606
Chlorination and Oxidation, R. - - - - - 748

Chlorobromids of Tin, R. - - - - - 744
Chloroform, Attraction to Nerve Cells in Narcosis, R. - - 260
Chlorothiocyanate of Mercury, R. - - - - 247
Chromatic Reactions with Organic Acids, R. - - - 626
Chromic Acid, Speed of Reduction by Phosphorous Acid, R. - 613
Chrome Alum, Effects of Heat upon Solutions of, R. - - 513
— Solutions, Indices of Refraction of, R. - - - 625
Chromium, Preparation of Pure, R. - - - - 120
Circular Polarization, R. - - - - - 62
— and Symmetry of Structure, R. - - - - 534
Citric Acid, Chromatic Reactions with, R. - - - 626
Classification of the Chemical Elements, R. - - - 502
Clausius-Mossotti Formula, R. - - - - 459
Clément and Desormes, Method for C_p/C_v, R. - - - 593
Clèveite Gas, Separation of Components by Diffusion, R. - 381
Coal Gas in Motors, Combustion of, R. - - - - 579
Cobalt, Effect of High Temperature on the Sulfid, R. - - 740
— Researches on the Sulfid, R. - - - - 381
Cobalt and Ammonia Compounds, Ions in, R. - - - 621
Colloids, Absorption in, R. - - - - - 444
Color of Alcohols and Water, R. - - - - - 194
— Changes of Salts under Cathode Rays, R. - - - 530
— Photography by Interferential Method, R. - - 330
— Reactions of Nitric and Chloric Acids with Aromatic Bodies, R. 458
Coloration, Artificial, of Crystals of the Alkaline Halids, R. - - 534
Coloration of Glass by Penetration of Metals or Metallic Salts, R. 750
Combustion of Coal Gas in Motors, R. - - - - 579
— of Gases near Cool Surfaces, R. - - - - 446
Composition of Water, R. - - - - - - 193
Compressibility of Gases, R. - - - - - - 259
— of Solutions, R. - - - - - - 602
Concentration in Dilute Solutions, Speed of Diffusion dependant on, R. 263
— Isosmotic, as determined by the Haematocrit, R - - 263
Condensers of Aluminum, R. - - - - - 437
Conductivity of Acetylene in Water, R. - - - - - 202

VOLUME IV No. 4

THE ASTROPHYSICAL JOURNAL

An International Review of Spectroscopy and Astronomical Physics

NOVEMBER, 1897

EDITORS

GEORGE E. HALE
Director of the Yerkes Observatory

JAMES E. KEELER
Director of the Allegheny Observatory

ASSISTANT EDITORS

J. S. AMES
Johns Hopkins University

HENRY CREW
Northwestern University

W. W. CAMPBELL
Lick Observatory

E. B. FROST
Dartmouth College

F. L. O. WADSWORTH, *Yerkes Observatory*

ASSOCIATE EDITORS

M. A. CORNU
École Polytechnique, Paris

C. S. HASTINGS
Yale University

N. C. DUNÉR
Astronomiska Observatorium, Upsala

A. A. MICHELSON
University of Chicago

WILLIAM HUGGINS
Tulse Hill Observatory, London

E. C. PICKERING
Harvard College Observatory

P. TACCHINI
Osservatorio del Collegio Romano, Rome

H. A. ROWLAND
Johns Hopkins University

H. C. VOGEL
Astrophysikalisches Observatorium, Potsdam

C. A. YOUNG
Princeton University

CONTENTS

THE IMPORTANCE OF ASTROPHYSICAL RESEARCH AND THE RELATION OF ASTROPHYSICS TO OTHER PHYSICAL SCIENCES — JAMES E. KEELER — 271

ASPECTS OF MODERN ASTRONOMY — SIMON NEWCOMB — 289

THE AIM OF THE YERKES OBSERVATORY — GEORGE E. HALE — 309

SPECTROSCOPIC NOTES — SIR WILLIAM and LADY HUGGINS — 320

NEW INVESTIGATIONS OF THE SPECTRUM OF β LYRAE — A. BÉLOPOLSKY — 326

ON THE CONSTITUTION OF THE RED SPECTRUM OF ARGON — J. R. RYDBERG — 336

SPECTRA OF BRIGHT SOUTHERN STARS — EDWARD C. PICKERING — 347

MINOR CONTRIBUTIONS AND NOTES:

The Dedication of the Yerkes Observatory, G. E. H., 351; *On the Variations Observed in the Spectrum of the Orion Nebula* W. W. CAMPBELL, 361; *Observations of the Spectrum of the Orion Nebula*, J. M. SCHAEBERLE, 362; *Variations in the Spectrum of the Orion Nebula*, R. G. AITKEN, 363; *Variations in the Spectrum of the Orion Nebula*, W. H. WRIGHT, 363; *Note on the Level of Sun-Spots*, GEORGE E. HALE, 364; *Note on the Presence of Vanadium in Rutile*, B. HASSELBERG, 366.
